Mohawks of the Bay of Quinte & World War One: Those who survived but whose deaths were related to their service

This month marks the 100th anniversary of the beginning of World War One (WW1). This also marks the beginning of what will be four years of commemoration. Last year, in November, we dedicated an article to "The Fallen", those who volunteered to serve and did not return home. This article is dedicated to those who volunteered, survived their military service, but who had a service related death.

David John Powless had died of pneumonia only weeks after his military discharge. The attending doctor informed the board that the 22 months he served in France had undermined his health so much that he was unable to survive his last illness.

On the 20th February 1919, the Toronto Star reported that the widow was to receive a full widow's pension from the Government. A full widow's pension amounted to \$936.00 per year.
